TWINBOSS

The SME Owner's Digital Twin

Less Busywork. Better Business.

AI-Powered Refund Management & Decision Engine

Team kpmbians | Domain 2 — Orbyte Smart SME Challenge

Kolej Profesional MARA Beranang

KPMBians

Refunds Shouldn't Drain Your Business

One refund request. Three major risks.

- **Fraud Risk** — Fake or unsupported claims
- **Decision Fatigue** — Repeated manual approvals
- **Cash-Flow Pressure** — Poor refund decisions

The Challenge: How can SMEs protect their money without losing customer trust?

Simple for Customers. Safer for SMEs.

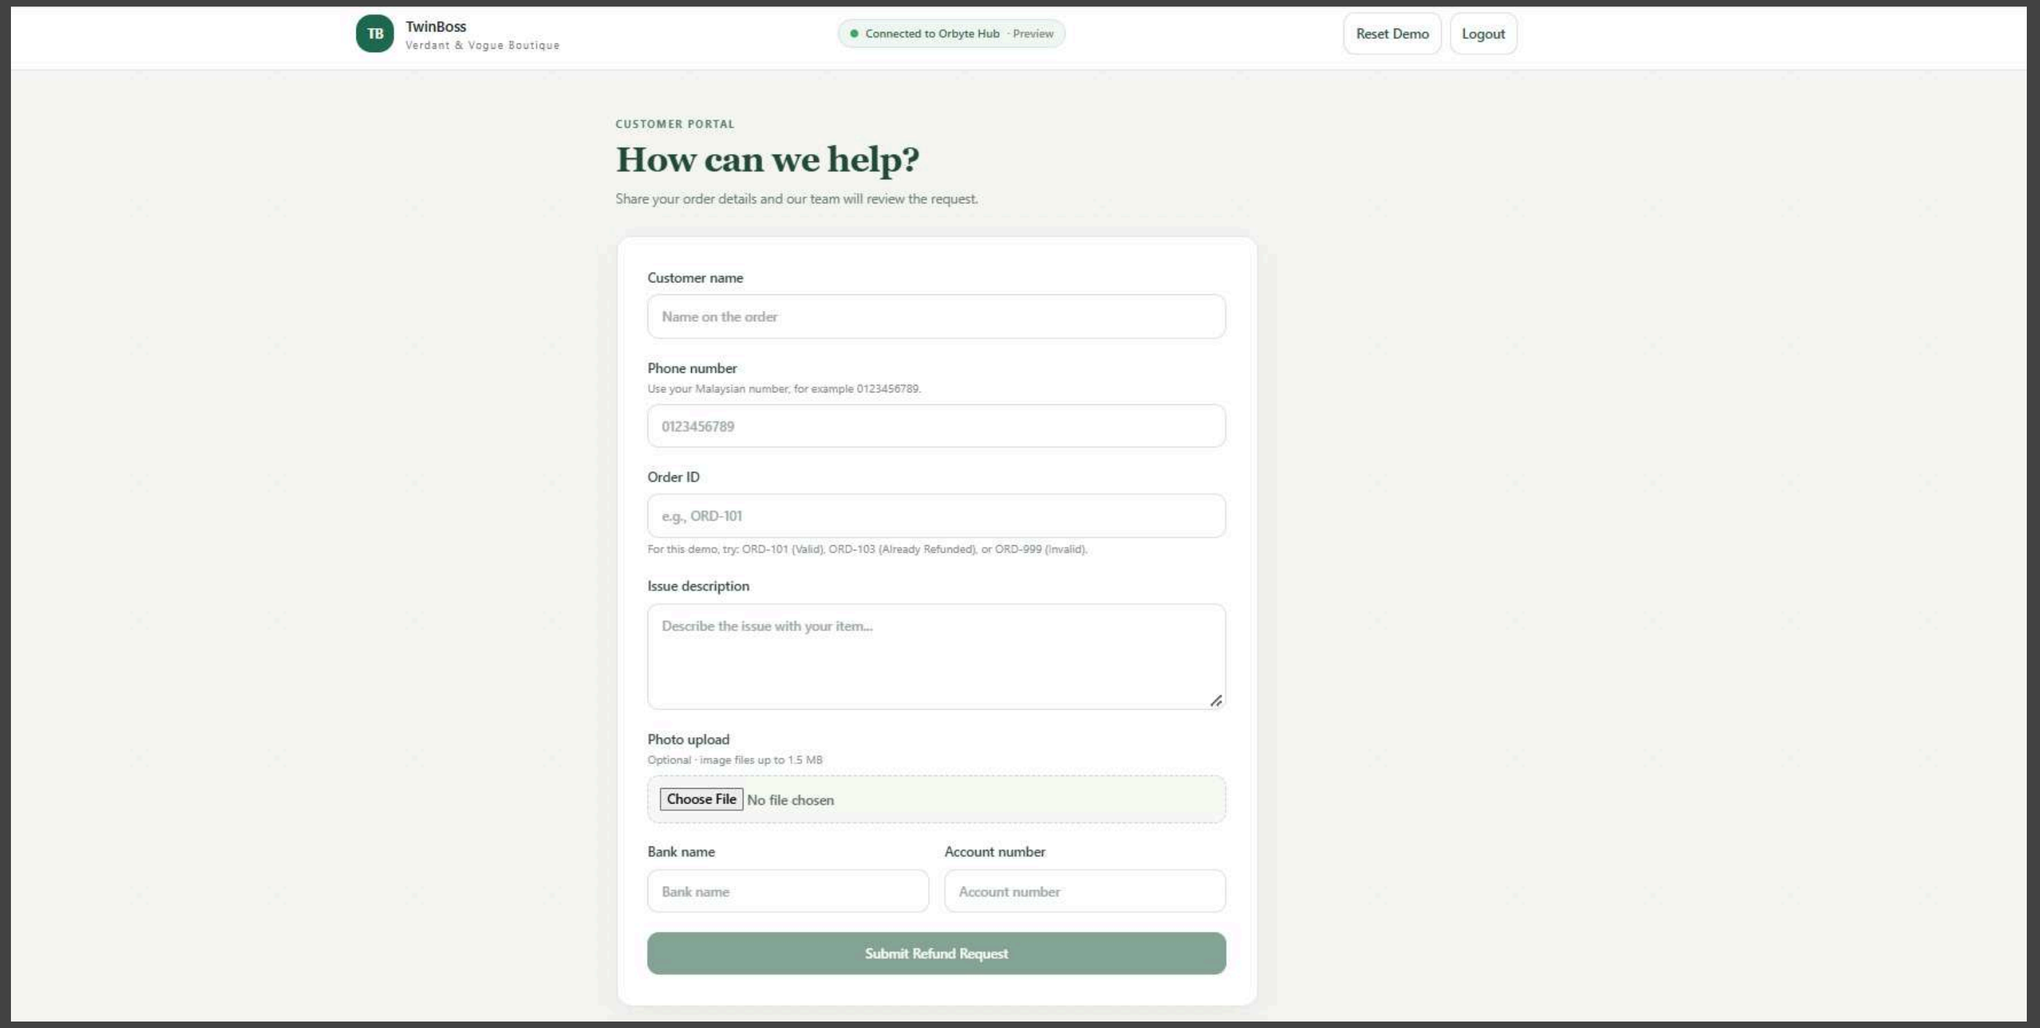

Structured Refund Submission

1. Enter Order ID
2. Describe the issue
3. Upload photo evidence
4. Submit for assessment

No customer-entered refund amount.

Order details and refund eligibility are assessed against available business records.

TwinBoss Customer Portal

KPMBians

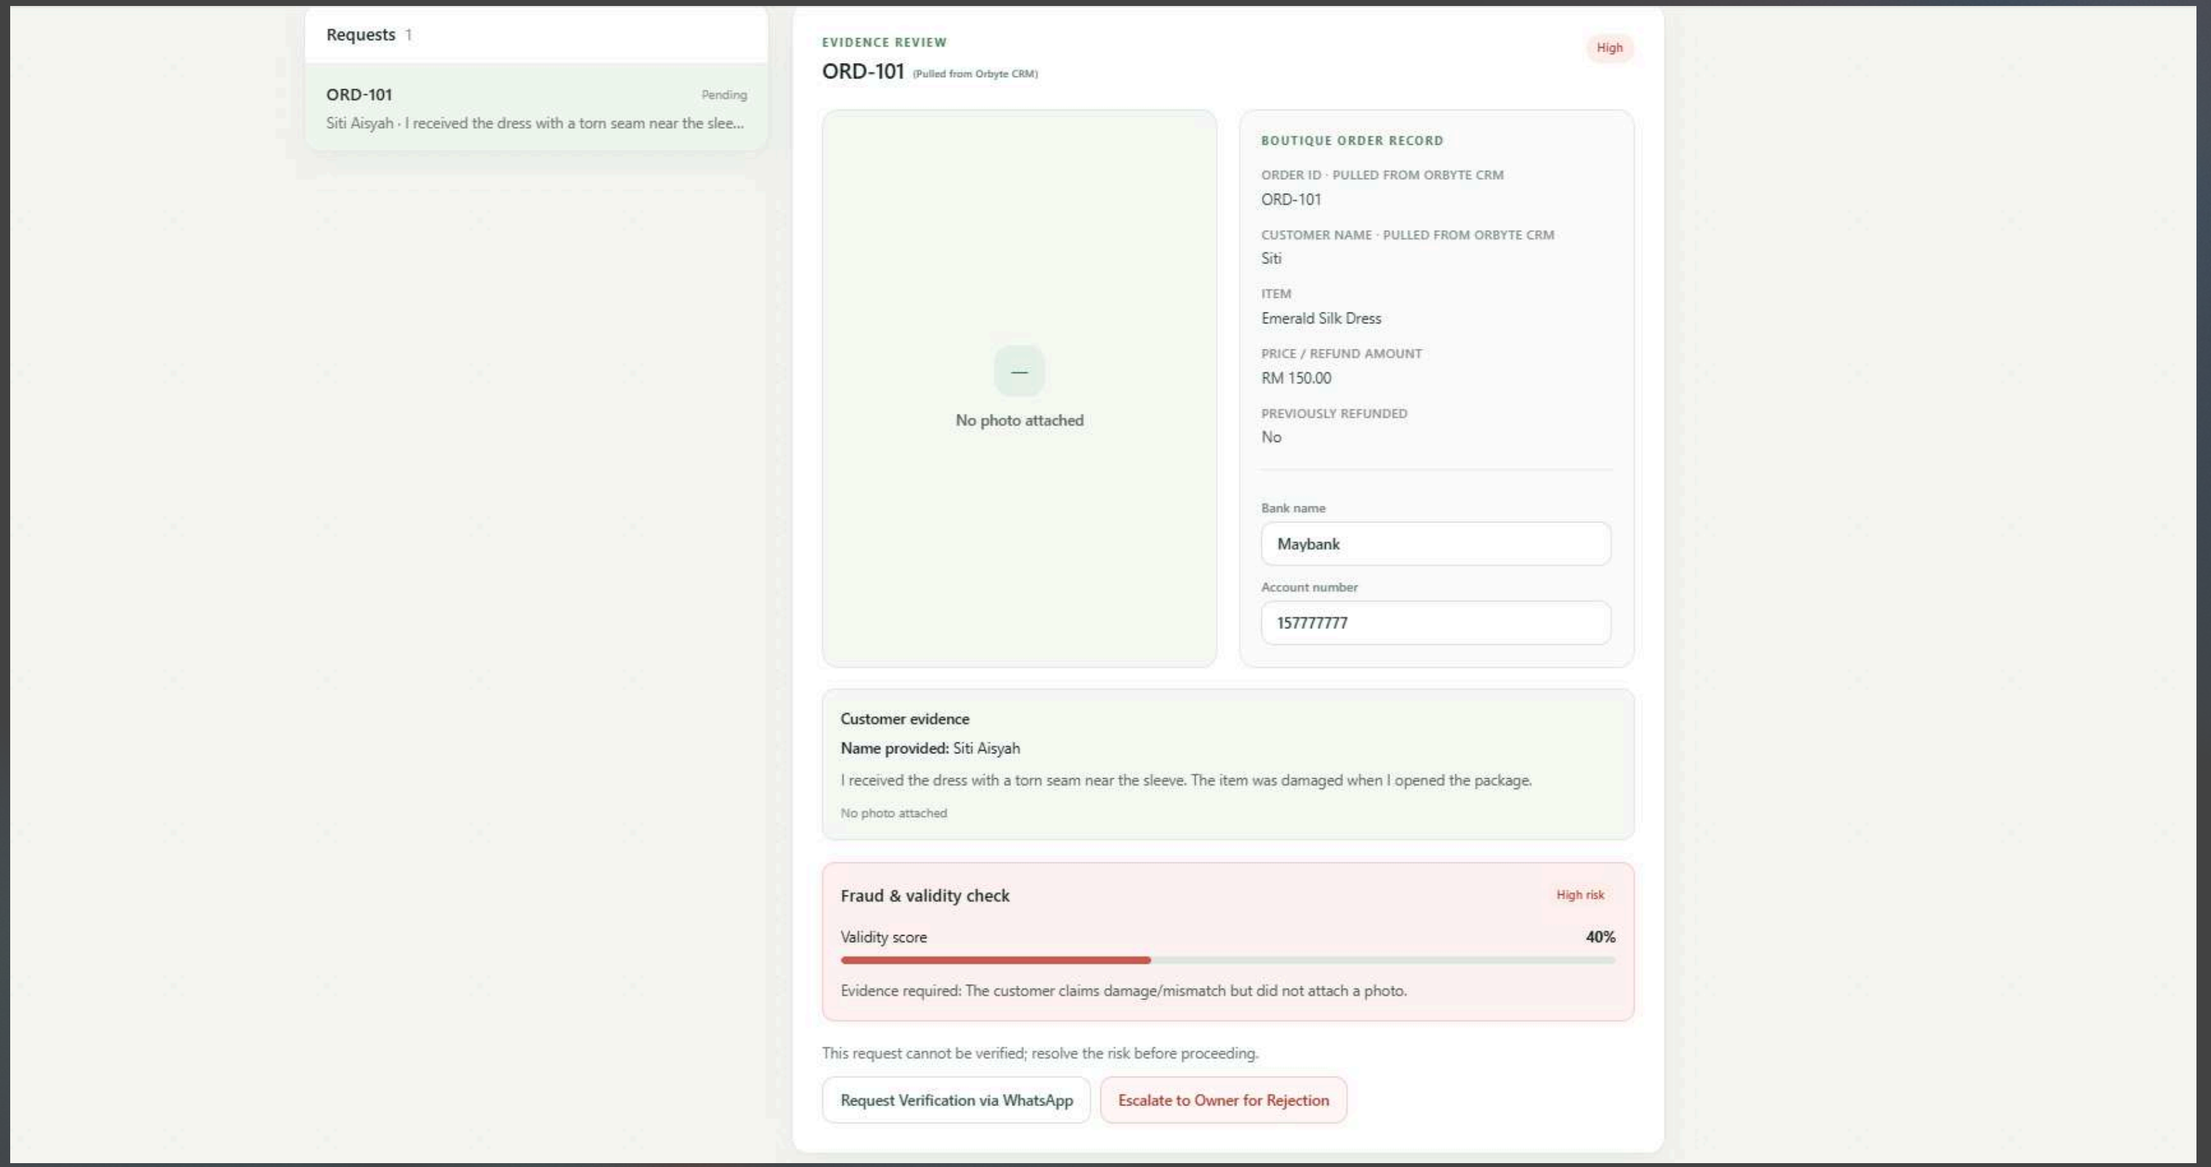

Your Digital Detective

AI-Assisted Refund Assessment

- Order and customer information checks
- Missing evidence and inconsistencies
- Refund validity scoring
- Potential duplicate-refund detection
- Untrusted customer input handling

AI flags potential risks. Humans verify the decision.

Automate Routine Work. Keep Control.

01 Auto-Pilot

Low-value, high-confidence requests can follow predefined rules.

02 Separation of Duties

Boss approves → Staff executes

03 Streamlined Execution

- Simulated payment processing
- Updated wallet balance
- WhatsApp customer notification link

Less manual work. More accountable decisions.

KPMBians

Built for the Orbyte Ecosystem

Current prototype: simulated business data, not a live Orbyte integration.

- Simulated business-record lookups
- Refund activity logs
- Structured decision history

Beyond Refunds

A decision engine concept that could be extended to supplier payments and other SME workflows.

Current prototype: simulated business data, not a live Orbyte integration.
